GITHUB

who uses github?

Although GitHub is primarily known within the software engineering community, it can be used in a variety of different industries. Any team or company working on different projects that require development in the form of files can use this service.

who created github?

Created by Linus Torvalds. So he decided to create his own version control system with branches from scratch and called it Git. Git is a different system from the previous ones because people can use branches.

the history of github:

GitHub has been around since 2008, when co-founder Chris Wanstrath created the first code commit for what would become the world's leading platform for software development.

what is github?

It is an online software development platform used to store, monitor and work with software projects. It makes it easy to share code files and work on collaborative open source projects.
